**HPV CANCERS**

\* GARDASIL® 9 is a prescription medicine, for females aged 9–45 years and males 9–26 years of age. It is a nine-valent recombinant human papillomavirus (HPV) vaccine. GARDASIL® 9 is indicated for 9–45 year-old females and 9–26 year-old males, for prevention of cervical, vulvar, vaginal, and anal cancer, precancerous or dysplastic lesions, genital warts or lesions, and infection caused by the HPV types in the vaccine. Each 0.5 mL dose contains the following HPV L1 Proteins by type: 6 (30 µg), 11 (40 µg), 16 (60 µg), 18 (40 µg), 31 (20 µg), 33 (20 µg), 45 (20 µg), 52 (20 µg), and 58 (20 µg). GARDASIL® 9 has risks and benefits, and should be used strictly as directed. Ask your doctor if GARDASIL® 9 is right for you. Tell your healthcare professional if you or your child have ever had an allergic reaction to any vaccine or to any of the listed ingredients for GARDASIL® 9, or if you or your child has a serious illness, blood disease, bleeding disorder, a high fever, or a weakened immune system (e.g. due to medicines, a genetic condition, or human immunodeficiency virus [HIV] infection). Common reactions are headache, fever, and injection-site pain, swelling, and redness. Fainting can occur. Allergic reactions are rare but serious. If you are worried by any side effects, see your doctor, pharmacist, or healthcare professional. Go to the nearest hospital if you experience wheezing, shortness of breath, or difficulty breathing; or pinkish, itchy swellings and rash, especially on the face. Immunisation does not replace the need for regular cervical cancer screening. Additional product information and Consumer Medicine Information is available from [www.medsafe.govt.nz](https://www.medsafe.govt.nz) (October 2019), and from Seqirus (NZ) Ltd, Auckland, on 0800 502 757. GARDASIL® 9 is funded for both males and females aged 9–26 years – normal charges will apply for other patients.
